

Buildings reporting a vista issue.

## Site Plan

Individual buildings are named for the mountains they face.

Numbering of individual units: When standing facing the front of each building, units are numbered... bottom, left to right and then top, left to right.

Example: 501 is bottom left, 502 is bottom right, 503 is top left and 504 is top right.

302	no		
303			
304			
401	no		As long as the trees in front of our unit are trimmed, our view is great. The committee in charge of that has done a great job.
402			
403	no		None. Good job and hello from Spain.
404			
501	no		
502			
503	ļ		
504	no		
601	no		The tall trees off the northeast corner of Fleetwood cut off some of our far left view from our sun porch. It's the same patch of trees that has long been of concern for the 7, 8, and 900 building unit owners. As we recall, the problem was much worse when we first moved here 17 years ago. But then Ron Rosenberger was able to persuade some of the tree owners to trim or "top," improving the views. They seem to have grown back to where they were before, but as yet are of little bother to us.
603 604	<b>yes</b> no	severe	Our Vista problem are tall trees in front of 800 building. They keep growing taller every year. I keep hoping for ice storm to take down the taller branches but no luck so far. I am sure you have heard from 800 building residents for whom this problem is very severe. My reason for identifying this as also problem for me (facing North East) from 600 building is to indicate my willingness to join 800 (and 700 building-if they so wish) in funding relief from these tall trees. Jack Holland
701	yes	severe	No view at all in summer in North corner.
702	,		

from my windows. Also, the bank is so eroded that it is difficult to get to my storage in the basement. Don't have a solution, but it is so steep and uneven, I have to hold onto the building to keep from falling down the bank.  901	Unit	Name	Degree	Comment(s)

804  yes severe severe severe to my storage in the basement. Don't have a solution, but it is so steep and uneven, I have to hold onto the building to keep from falling down the bank.  901 yes moderate 902 903 no 904  905 has had a Vista problem for several years now. When Chuck and I bought the unit you could see on a clear day seven mountain ranges. For the past few years this view has become obstructed to the point that you can see mountains from one window on the main floor and the other from the single window in the loft. Chuck Ball led the crusade to restore our view for which I sent a check in the amount of \$2,500. All units in the 900 building were for retrieving our view. Sharon McCarson, my housekeeper for all these fourteen years, reported that I would be disappointed that this made no improvement for my unit. I have been unable to get to Fleetwood. In the spring it was because of my radiation treatments. This fall it was because of a scheduling conflict with a big trip overseas for nearly a month. Now I am marketing my unit at a loss because my best selling feature no longer exists. I saw Fleetwood pre-construction advertised as the best view in town. Well, that view receded through no fault of mine. Now people like Jimmy Porter are thrilled for what it did for his unit and I spent \$2,500 for no benefit. I may as well be down the mountain in town.  Our neighbor Chuck Rouse on Pinewood Circle has a few trees that block our view to the northwest. Some trees are pine (Hemlock or Spruce) and some are Tulip Poplar. Also, a neighbor of Chuck's has a long line of ten Tulip Poplar trees that are very obstructive to our view. The view is a little better now that the leaves	801	yes	moderate

Unit	Name	Degree	Comment(s)
1003	no		We donated \$500 to improve the vista of unit 1003 and didn't mind being asked to help with the cost. However, we do not approve of a blanket policy of splitting the the costs. It should be decided on a case by case basis. And, it is very important that it should always be voluntary.
